Apr 2021 — May 2021

Job Emulations

Job emulation in NoCountry

Mobile application development for a month in a team of 7 people, using Technologies such as React Native in addition to AWS Amplify as support for DB, I work mainly in the Backend but developed components for the Frontend.

We carried out an application for Blood Donation Location of Donation centers using Google Map API. In addition, the user could register as a Blood Giver if they met certain requirements, publications could be made requiring help in the community in addition to being shared on the networks social, an interesting project that is very challenging and comforting

Emitido por: **NoCountry**
mar 2024

Projects

Gledah Desktop App

Development of a Desktop Application, for the management of a White Line store

Technologies: React – Electronjs - javascript –nodejs – Expressjs - postgres
